Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the Issue Fee.

Claims 2, 3 and 5-8 are canceled as being drawn to non-elected inventions.

Reasons For Allowance

The present invention is directed to fuel control in a combined cycle power plant comprising a gas turbine and steam turbine connected by a clutch. As indicated by the various references listed on the PTO-892 and 1449's, this type of turbine and clutch system is well known in the art. None of the references of record however show or fairly suggest such a system combined with a load feedback type fuel control that replaces the normal load set point value with the actual load value for a fixed period before and after clutch engagement and disengagement as specified in the present claims. The claimed invention is therefore considered patentable over the prior art.
